

Project: Sprint 0 - Environment setup and high level requirements & conceptual design

TEAM MEMBERS : (1)Abhinay Bandi Naga (2)Ankita Kumari (3)Divya Patel (4)Hari Chandana Parimii

PROJECT PROPOSAL

Content, Scope and Objectives

Our goal is to make a web application on which our users can make and take the quiz. Quiz will contain multiple choice questions and True/False questions. Quiz will have limited time and after that it will give you analysis of your quiz and marks. This web application is for users to practice in efficient and easy way. We will have more than 10 categories and each will contain probably more than 100 questions. Also, user can add question to category if they want. We will be focusing more on backend part of website than frontend. We will try to make user interface as interactive as we can do.

PROJECT ENVIRONMENT

The application will be a web based application built using PHP and HTML with MySQL.

- MySQL 5.5.24
- Django Or Nodejs
- Apache server 2.2.22
- HTML 5
- CSS 4.0

Initial user roles

User Role	Description
Students	-Can search and take quiz according to their interests. - Also they can make their own quiz and add questions to different quiz.
Administration	-Can access and update category , subjects , questions. -Can access user information and give them access to update or make a new quiz.
Professors	-Can create quiz and add question

	-Can share this quiz to their students
Premium User	-Can make private quiz and give access to selected user who only can see.

Initial user story descriptions

Story ID	Story description
US1	As a student, I want to login to the system so that I can take the quiz and view result after completing each question.
US2	As a student, I want to create or update a quiz.
US3	As a student, I want to search the quiz by subject.
US4	As an administrator, I want to create and update different categories of quizzes subject wise.
US5	As a professor, I want to login to the system so that I can create quiz and can share with the students.
US6	As a student, I want to ask doubts to the professors.
US7	As a premier user, I can make private quiz which are accessible by authorized user only

Query:

We first connected frontend and backend using django framework. Then in frontend we are just getting text query using post method and retrieve that query answer from database. **For right now, we just input value on two tables because other table data will create by users only.**

Here you just have to add query and it will get data from the table

Query: select * from Quiz

1. If both 112 and 33 are factors of the number $x * 43 * 62 * 1311$, then what is the smallest possible value of x ?	121 3267 363 33	363
2. How many different positive integers exist between 106 and 107, the sum of whose digits is equal to 2?	6 7 8 9	7
3. How many integral divisors does the number 120 have?	14 16 12 20	16
4. What is the remainder when $1044 * 1047 * 1050 * 1053$ is divided by 33?	3 27 30 31	30
5. For what value of m will the quadratic equation $x^2 - mx + 4 = 0$ have real and equal roots?	16 8 2 -4	-4
6. 3 multiply by 20	120 60 20 0	60
7. What is the next prime number after 7?	9 17 11 23	11
8. 5 to the power of 0 equals what?	5 1 0 25	1
9. What does 3 squared equal?	27 25 3 9	9
10. How many sides does a decagon have?	10 9 7 None Of These	9

justification of Candidate Key: quiz_id ,username, and timestamp can be used to uniquely identify the rows of score table.

Highest Normalization: 4NF

Improvements: We increase the scope by making new table options. Now, we are able to have all multiple choice, True/False or descriptive question.

Query:

- 1 Math
- 2 GK
- 3 Machine Learning
- 4 Computer Networks
- 5 Python
- 6 Java
- 7 Science
- 8 Physics

1	1 What is 2 multiply by 2?	4
2	1 What is 1004 divided by 2?	502
3	1 The average of first 50 natural numbers is	25.5
4	1 A fraction which bears the same ratio to 1/27 as 3/11 bear to 5/9 is equal to	1/55
5	1 The number of 3-digit numbers divisible by 6, is	150
6	1 A clock strikes once at 1 o'clock, twice at 2 o'clock, thrice at 3 o'clock and so on. How many times will it strike in 24 hours?	156
7	1 $106 \times 106 - 94 \times 94 = ?$	
8	1 Which of the following numbers gives 240 when added to its own square?	15
9	1 Evaluation of $83 \times 82 \times 8 - 5$ is	1
10	1 Which one is simplest form of 1.5 : 2.5 ?	3:5

Email

Type (It will have two value student(0)and teacher(1) because they will have different functionality. We did not include admin because we are having only fix admin as us .)

Justification of primary key : Each user will have different username so it can be used to identify the whole table

Highest Normalization: 4NF

Indexes:

1)Index : clustered

Columns: Username

Justification of Index: Username which is a primary key of the user table helps for fast retrieval of data from the table.

2)Index : Non_Clustered

Columns: First_name

Justification of Index: Most the search for user happen based on the name of the user. So to speed up the query process a non clustered index is created.

3) Index: Non_Clustered

Columns: Last_name

Justification of Index: The searches for user happen based on the last_name of the user. So to speed up the query process a non clustered index is created.

Categories

Columns:

Category_id

topics

Justification of Primary Key: Each category has a unique category_id so it can be used to identify the rows of the table.

Highest Normalization: 4NF

Index: Clustered

Columns: Category_id

Justification of Index: Category_id which is a primary key of the categories table helps for fast retrieval of data from the table. It is a default index created by database

Level

Columns:

level_id

levels

Justification of primary key : Each level has a unique level id so it can be used as a primary key

Highest Normalization: 4NF

Index: Clustered

Columns: level_id

Justification of Index: level_id which is primary key of level table helps for fast retrieval of data from the table. It is a default index created by sql server

Quiz

reference of
category_id
from categories)

timer

creator_id(foreign key
reference of
username of
user table)

last_mofied_time

Justification of primary key : Each quiz will have a unique quiz_id so it can be used as a primary key

Highest Normalization: 4NF

Index:1) Clustered

Columns: Quiz_id

Justification of Index:

Quiz_id which
is a primary key
can be used to
retrieve all the
details of the
table in a faster
way and this
index is created
by sql server in
default.

2) Non clustered

Columns: category_id

Justification of Index:

Category_id in
this table is a
primary key of
other table so an
index is created
by default by
sql server which
helps for
improving the

performance)

3) Non clustered

Columns: level_id

Justification of Index:

level_id in this
table is a
primary key of
other table so an
index is created
by default by
sql server which
helps for
improving the
performance)

4) Non clustered

Columns: creator_id

Justification of Index:

creator_id in
this table is a
primary key of
other table so an
index is created
by default by
sql server which
helps for
improving the
performance)

Questions

Columns:

Question_id

Quiz_id(foreign key, reference of quiz_id from quiz)

Question

Correct Answer

hint

imgurl

Justification of candidate key: Question_id and Quiz_id can be used to uniquely identify the tuples of the table.

Highest Normalization: 4NF

1)index: Clustered

Columns: Question_id

Justification of index: Question_id is a primary key and a default clustered index is created by the sql server to improve the performance.

2)index: Clustered

Columns: Quiz_id

Justification of index: Quiz_id is a foreign key and a part of the primary key so a default index is created by the sql server.

Options

Columns:

Quiz_id(foreign key, reference of Quiz_id from Quiz)

Question_id(foreign key, reference of Question_id from Questions)

Option_Id

Options

Justification to Primary Key: Option_id can be used to uniquely identify all the other attributes.

Highest Normalization: 4NF

1)Index: Clustered

Columns: Option_id

Justification of Index: Option_id is a primary key and a default index is created by sql server

2)Index: Clustered

Columns: Quiz_id

Justification of Index: Quiz_id is a foreign key and the part of a primary so a clustered index is created automatically by the sql server.

3)Index: Clustered

Columns: Question_id

Justification of Index: Question_id is foreign key and the part of a primary key so a clustered index is created automatically by the sql server.

Answers

Columns:

Quiz_id (foreign key, reference of Quiz_id from quiz))

Question_id(foreign key, reference of Question_id from Questions)

Username(foreign key, reference of Username from User)

Answer

Count_No

Justification to candidate key : By using quiz_id, Question_id and username all the other details can be identified uniquely.

Highest Normalization: 4NF

1) Index: Clustered

Columns: Question_id

Justification of Index: Question_id is foreign key and the part of a primary key so a clustered index is created automatically by the sql server.

2) Index: Clustered

Columns: Quiz_id

Justification of Index: Quiz_id is foreign key and the part of a primary key so a clustered index is created automatically by the sql server.

3) Index: Clustered

Columns: Username

Justification of Index: Username is foreign key and the part of a primary key so a clustered index is created automatically by the sql server.

Score

Columns:

Quiz_id (foreign key, reference of Quiz_id from Quiz)

Username (foreign key, reference of Username from User)

Score

Attempt_No

Timestamp

Justification of Candidate Key: quiz_id, username, and timestamp can be used to uniquely identify the rows of score table.

Highest Normalization: 4NF

1) Index: Clustered

Columns: Quiz_id

Justification of Index: Quiz_id is foreign key and the part of a primary key so a clustered index is created automatically by the sql server.

2) Index: Clustered

Columns: Username

Justification of Index: Username is foreign key and the part of a primary key so a clustered index is created automatically by the sql server.

3)Index: Clustered

Columns: Timestamp

Justification of Index: Timestamp is a primary key so a clustered index is created automatically by the sql server.

payment

Columns:

payment_id

Username (foreign key, reference username from user)

Card_no varchar(30)

Expiry_date date

Cvv

Zip

status

Deadline

Justification of Primary key: Each payment has a unique primary key so it can be used as a primary key to identify all the rows of the table.

Highest Normalisation: 4NF

1)Index: Non_Clustered

Columns: Username

Justification of Index: Username is foreign key so a non_clustered index is created automatically by the sql server.

Index: Clustered

Columns: Payment_id

Justification of Index: Payment_id is a primary key so a clustered index is created automatically by the sql server.

Index: Clustered

Columns: Card_no

Justification of Index: Card_no has unique key constraint so a clustered index is created automatically by the sql server.

feedback

feedback_id

Quiz_id(foreign key, reference quiz_id from quiz)

Username(foreign key, reference username from user)

feedback

ratings

Justification of Primary key: Each feedback from user has a unique feedback_id so it can be used to identify all the rows of a table uniquely.

Highest Normalisation: 4NF

Index: Clustered

Columns: feedback_id

Justification of Index: feedback_id a primary key so a clustered index is created automatically by the sql server.

Index: Non_Clustered

Columns: Quiz_id

Justification of Index: Quiz_id is foreign key so a clustered index is created automatically by the sql server.

Index: Non_Clustered

Columns: Username

Justification of Index: Username is foreign key so a clustered index is created automatically by the sql server.

Stored Procedure:

- 1) **Date_modify:** To change the last_modified column to current timestamp.

```

2)**Category_level_Quiz:** To see Quiz title, timer, level , category in one table only

```
CREATE VIEW `Category_level_Quiz` AS
```

```
Select q.Title,q.timer,c.topics,l.levels from Quiz q inner join level l on l.level_id = q.level_id  
inner join categories c on c.category_id = q.category_id ;
```

	Title	timer	topics	levels
►	integers	00:00:30	maths	beginner
	integers	00:00:30	maths	medium
	integers	00:00:30	maths	hard
	integers	00:00:30	computerScience	beginner
	integers	00:00:30	computerScience	medium
	integers	00:00:30	computerScience	hard
	integers	00:00:30	DatabaseSystems	beginner
	integers	00:00:30	DatabaseSystems	medium
	integers	00:00:30	DatabaseSystems	hard

3)**Question_Quiz:** To see join version of question,quiz and options to take overview

```
CREATE VIEW `Question_Quiz` AS
```

```
Select q.Title,c.topics,qe.Question,qe.Correct_Answer,o.options from Quiz q,Questions  
qe,categories c,Options o where q.Quiz_id = qe.Quiz_id and q.category_id = c.category_id  
and o.Question_id = qe.Question_id and o.Quiz_id = qe.Quiz_id ;
```

	Title	topics	Question	Correct_Answer	options
►	integers	maths	What is the sum of first 10 prime numbers?	129	129
	integers	maths	What is the sum of first 10 prime numbers?	129	130
	integers	maths	What is the sum of first 10 prime numbers?	129	140
	integers	maths	What is the sum of first 10 prime numbers?	129	150
	integers	maths	The number of 3-digit numbers divisible by 6, is?	150	129
	integers	maths	The number of 3-digit numbers divisible by 6, is?	150	130
	integers	maths	The number of 3-digit numbers divisible by 6, is?	150	140
	integers	maths	The number of 3-digit numbers divisible by 6, is?	150	150
	integers	maths	A clock strikes once at 1 o'clock, twice at 2 o'clock, ...	156	129
	integers	maths	A clock strikes once at 1 o'clock, twice at 2 o'clock, ...	156	130
	integers	maths	A clock strikes once at 1 o'clock, twice at 2 o'clock, ...	156	140
	integers	maths	A clock strikes once at 1 o'clock, twice at 2 o'clock, ...	156	156
	integers	maths	Which of the following numbers gives 240 when...	15	12
	integers	maths	Which of the following numbers gives 240 when...	15	15
	integers	maths	Which of the following numbers gives 240 when...	15	36
	integers	maths	Which of the following numbers gives 240 when...	15	25.5
	integers	maths	The average of first 50 natural numbers is?	25.5	12

4)**Correct_Answer:** To compare user answer with original answer

CREATE VIEW `Correct_Answer` AS

Select q.Question,q.Correct_Answer,a.Answer,a.count_no,a.Username from Questions q, Answers a where q.Question_id = a.Question_id and q.Quiz_id = a.Quiz_id ;

	Question	Correct_Answer	Answer	count_no	Username
►	Which SQL statement is used to extract data fr...	Select	Select	1	abhinay_1
	Which SQL statement is used to extract data fr...	Select	Select	2	abhinay_1
	Which SQL statement is used to update data in ...	update	update	1	abhinay_1
	Which SQL statement is used to update data in ...	update	update	2	abhinay_1
	Which SQL statement is used to delete data fro...	delete	Select	1	abhinay_1
	Which SQL statement is used to delete data fro...	delete	delete	2	abhinay_1

Triggers:

1)**score_trigger:** Whenever user submit the answers , this trigger will run and call scorecal procedure to calculate score and it to score table

DELIMITER \$\$

CREATE Trigger `score_trigger`

after insert on Answers

for each row

BEGIN

declare uname char;

```

declare qid int;
declare num int ;
set uname = (select Username from Answers);
set qid = (select Quiz_id from Answers);
set num = (select count_no from Answers);
CALL scorecal(uname,qid,num);
END$$
DELIMITER ;

```

2) **Modify:** Whenever user will update some question of existent quiz then this trigger will run and call date_modify procedure

```

DELIMITER $$
CREATE Trigger `modify`
before update on Questions
for each row
BEGIN
declare quiz_id int;
set quiz_id = new.Quiz_id;
CALL date_modify(quiz_id);
END$$
DELIMITER ;

```

Improvements: We increase the scope by making new table options. Now, we are able to have different categories and level of difficulty for each quiz and the payment option through which a user can become a premium user by paying certain amount and the premium user can see the average score of that quiz and all the users can see the quiz time and how many times they have taken that quiz and their highest score.

User Interface:

1 1 What is the sum of first 10 prime numbers?	129	None None
1 2 what is square of 5	25	None None
1 3 John borrows 5 dollars from his parents. He then borrows \$23 from his friends. What is the amount John owes?	28	None None
1 4 Andy read 4/5 th of a story book which has 100 pages. How many pages of the book is not yet read by Andy?	20	None None
1 5 Moving of messages of from originator to recipient is called?	transfer	None None
1 7 A number is greater than 3 but less than 8. Also the number is greater than 6 but less than 10. What is the number ?	7	None None
1 8 A database is divided into?	Records	None None
1 9 Which SQL statement is used to extract data from a database?	Select	None None
2 1 The number of 3-digit numbers divisible by 6, is?	150	None None
2 2 Find the sum of (+4)+(+20)	24	None None
2 3 A football team gained 9 yards on one play and then lost 22 yards on the next. Write a sum of integers to find the overall change in field position.	-13	None None
2 4 The quotient in a division sum is 403. The divisor is 100 and the remainder is 58. The dividend is?	40358	None None
2 5 What are special test messages consisting of empty envelopes?	probes	None None
2 7 A clock reads 4:30. If the minute hand points East, in what direction will the hour hand point?	North-East	None None
2 8 Primary keys are use to identify a unique set of records?	True	None None
2 9 Which SQL statement is used to update data in a database?	update	None None
3 1 A clock strikes once at 1 o'clock, twice at 2 o'clock, thrice at 3 o'clock and so on. How many times will it strike in 24 hours?	156	None None
3 2 what is the value of -12 - (-10)	-2	None None
3 3 a number less than zero	Negative Number	None None
3 4 Which least number should be added to 2600 to make it a perfect square?	1	None None
3 5 Which is an optical disk?	CDROM	None None
3 7 The sum of squares of two numbers is 80 and the square of difference between the two numbers is 36. Find the product of two numbers	22	None None
3 8 Validation can ensure that no incorrect data is entered?	True	None None
3 9 Which SQL statement is used to delete data from a database?	delete	None None
4 1 Which of the following numbers gives 240 when added to its own square?	15	None None
4 2 Put in order from least to greatest.-5, 0, -3, 5, -2, 4, 1	-5,-3,-2,0,1,4,5	None None
4 4 The least number of five digits which is completely divisible by 39, is ?	10023	None None
4 5 1 byte equals how many bits	8	None None
4 7 The value of $1.07 \times 65 + 1.07 \times 26 + 1.07 \times 9$ is?	107	None None
4 8 What does SQL stand for?	Structured Query Language	None None
5 1 The average of first 50 natural numbers is?	25.5	None None
5 2 What is the absolute value of -7?	7	None None
5 4 What is 121 times 11 ?	1331	None None
